PREFACE

This manual describes operating procedures of UNIVERGE Digital Phone DT410/DT430 Multiline Terminal to be connected to UNIVERGE SV9300 communication server.

OUTLINE OF THIS MANUAL

This manual consists of:

INTRODUCTION

Please read through this chapter before use for your understanding and proper use of this product.

TERMINAL SETUP

This chapter describes the operations to be performed on the Menu Screen, such as speaker volume control and LCD contrast adjustment.

FEATURE OPERATION

This chapter describes the operating procedures of service features such as make a call, answer an incoming call, set call transfer or call hold.

DIAL BY NAME

This chapter describes how to use directory service.

APPENDIX

This chapter describes the supplemental information of this manual.

ABOUT THE MARKS USED IN THIS MANUAL

The following table shows the meaning of the marks used in this manual.

<table>
<thead>
<tr>
<th>MARK</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>!</td>
<td>CAUTION: The works that a user cannot perform by himself, some dangers that may cause damages to the terminal and other cautions are described.</td>
</tr>
<tr>
<td>☑</td>
<td>TIP: Useful tips when using this terminal are described.</td>
</tr>
</tbody>
</table>

TERMS IN THIS MANUAL

The following table shows the terms described in this manual.
<table>
<thead>
<tr>
<th>TERMS</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dial Tone</td>
<td>You will hear the dial tone from handset when you hang up the hand set. If you press speaker key, you will hear the dial tone from speaker.</td>
</tr>
<tr>
<td>Special Dial Tone</td>
<td>If you press the transfer key while you are in conversation with calling party, you will hear the special dial tone.</td>
</tr>
<tr>
<td>Ringback Tone</td>
<td>When you dial an extension number, you will hear the ringback tone from handset.</td>
</tr>
</tbody>

| (8) | Cursor key (For DT430) / Up/Down key (For DT410) | **[ For Cursor key ]**  
Enter key  
This terminal has Shortcut Menu for frequently-used features. Use this key to display the Shortcut Menu and determine the selected item in the menu. Also, this key is used as cursor-movement key on the local menu of the terminal.  
**Volume (UP/DOWN) key**  
Used to adjust LCD contrast, speaker/receiver volume, and ringer volume.  
**Right key (Directory)**  
Press this key to open the Directory menu.  
**Left key (Redial)**  
Press this key to activate Redial feature. Press Redial and scroll back through numbers that have been dialed. When the desired number is displayed, press $\times$ or $\div$ to activate dialing.  
**[ For Up/Down key ]**  
Used to adjust LCD contrast, speaker/receiver volume, and ringer volume. |
<p>| (9) | Menu key | To access the menu of terminal. |
| (10) | Mic key (with light) | To respond handsfree. LED lights during speakerphone operation. |
| (11) | Feature key (with light) | To activate features such as terminal setup and to program One-Touch Speed Calling keys. |
| (12) | Answer key (with light) | When LED on this key is lit, press this key to answer the incoming call. |
| (13) | Recall key | To finish a call and hear the dial tone to make an another call. |
| (14) | Programmable keys (with light) | These keys can be programmed as Flexible line key/Programmable feature key by system administrator. |
| (15) | Soft keys | The feature name is shown at the bottom of the LCD. The appropriate feature key is displayed on the screen according to the call handling process. |
| (16) | Help key | To call up explanations of the Soft keys on the LCD. |
| (17) | LCD | To display date or dialed number etc. |
| (18) | Call Indicator Lamp | The lamp at the top corner of display flashes when a call terminates to the terminal. Also, when you use “VOICE MAIL” on page 39, the lamp lights when a message has been left. |
| (19) | Redial | The last number called is memorized automatically, so without dialing the last number called again, it can send any number of times. |
| (20) | Conf | Press key to establish a three-way conversation. LED on key lights when key is active. |
| (21) | Message | Press key to access the voice mail system. |</p>

</table>

(Phone, Message and Directory)

The feature key is set by system data setting at initial installation. For details, please contact the system administrator.
ATTACHING HANDSET

1. Insert the modular jack of curled code into the [HANDSET] connector on the backside of the terminal until “click” is heard.

2. Fit the curled cord into the groove to be fixed.
ATTACHING OR REMOVING FACEPLATE AND DESI PRINTER SHEET

REMOVING FACEPLATE AND DESI PRINTER SHEET

Remove DESI Printer Sheet with following ways.

1. Use the small notch at the lower right corner of the terminal to lift the Faceplate up.
2. Remove the Faceplate.
3. Remove the DESI Printer Sheet.

ATTACHING FACEPLATE AND DESI PRINTER SHEET

1. After replacing the DESI Printer Sheet on the terminal, attach the Faceplate.
2. At each corner, press the locking pin back into place.

ADJUSTING ANGLE OF TILT LEGS

The height can be adjusted by moving the legs attached to the bottom of the terminal.

RAISING TILT LEGS

1. Turn the terminal over (key side down).
2. Raise Tilt Legs to desired height.

3. Turn the terminal over (key side up).

**LOWERING TILT LEGS**

1. Turn the terminal over (key side down).
2. Lower Tilt Legs to desired height.

3. Turn the terminal over (key side up).
CONNECTING LINE CORD

1. Plug the modular plug of line cord into the LINE connector on the bottom of terminal.

   (1) Terminal
   (2) Line Cord
   (3) Modular Plug
   (4) Line Connector

2. Fit the line cord into the groove to be fixed.

   (1) Terminal
   (2) Groove
   (3) Line Cord

3. Press the line cord into the groove.

   (1) Tilt Legs
   (2) Groove
   (3) Line Cord
ATTACHING DIRECTORY CARD

The Directory Card can be used to record often dialed numbers or other important information.

Directory Card (VAL DIRECTORY CARD UNIT) is optional.

2. Take the protective sheet off from the plastic cover.
   The surface of the plastic cover is put out.
3. Push the Directory Card Holder into the grooves on the terminal until they snap into place.
CONNECTING HEADSET

CONNECTING HEADSET WITH TERMINAL

According to the following procedure, Headset is connected to HEADSET Connector which is located bottom of terminal.

For the headset that is available to connect with terminal, please contact the NEC's dealer or NEC.

HOW TO CONNECT HEADSET

1. Plug the modular plug of headset into the HEADSET connector on the bottom of terminal.

2. Fit the headset cord into the groove to be fixed.

Refer to the "TO MAKE A CALL USING HEADSET" on page 28.
WALL MOUNTING

Wall mounting of the terminal is installed with optional Wall Mount Unit.

REQUIRED SPACE

Use the template shown in following figure for required spacing before drilling.

HOW TO MOUNT UNIT

This section shows the installation procedure for wall mounting.

1. Turn terminal over (key side down).
2. Remove the hanger hook from the terminal, and then reverse it and reinsert it to the terminal.

3. Turn the terminal over, and then spread the Tilt Legs.
4. Install the WM-L UNIT on the wall or on the wall plate.

Select the one of the following procedures.
- Mount Terminal on Wall using WM-L UNIT
  Attach the WM-L UNIT to the wall using six screws or using two wall mounted screws.

```
(1) WM-L UNIT
(2) Screws (Attached parts)
(3) Screws (Local supply)
(4) WM-L UNIT
```

- Mount Terminal on Wall Plate using WM-L UNIT
  Locate the screw holes on the base and hang the cover over the screws on the wall plate.

```
(1) Wall Plate
(2) Screws
(3) WM-L UNIT
```
5. **Mount the Modular Rosette at the WM-L UNIT hole space.**
   If the modular rosette is not used, proceed to the following step.

   ![Mounting Diagram](image)

   (1) WM-L UNIT
   (2) Modular Rosette

6. **Plug the modular plug of line cord into the connector of the modular rosette.**

   ![Plugging Diagram](image)

   (1) Modular Rosette
   (2) Line Cord

7. **Put the remaining line cord at the bottom of WM-L UNIT. And plug the modular plug of line cord into the LINE connector on the terminal.**

   ![Connecting Diagram](image)
8. *Fit the line cord into the groove to be fixed.*

9. **Align the four cutouts on the bottom of the terminal with the tabs on the WM-L UNIT.**
   Put the remaining line cord into the WM-I UNIT.

   - (1) Line Cord
   - (2) ML-L UNIT
   - (3) Line Connector
   - (4) Modular Plug
   - (5) Groove
   - (6) Terminal

   - (1) Cutouts on WM-L UNIT
   - (2) Cutouts on terminal
ABOUT SCREENS

PHONE SCREEN AND MENU SCREEN

The terminal displays two types of screen.

When making/receiving a call, Phone Screen is displayed. (The following shows an example of shows example of Phone Screen when the terminal is idle status.)

![Phone Screen Example]

Press key to display the Menu Screen.

![Menu Screen Example]

MENU SCREEN

By pressing key, you can use various application features such as History etc.

<table>
<thead>
<tr>
<th>ICON</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Call History</td>
<td>To view Call History; the history data stored in the system memory (refer to “CALL HISTORY” on page 67), such as the histories of missed calls, dialed numbers and received calls.</td>
</tr>
<tr>
<td>Directory</td>
<td>To use Directory features; the common and personal directory data are registered in the system. (For details, refer to “DIAL BY NAME” on page 74) For details, please contact the system administrator.</td>
</tr>
<tr>
<td>Setting</td>
<td>This menu is used for user settings of the terminal such as incoming call and display.</td>
</tr>
<tr>
<td>Shortcut</td>
<td>The LCD displays icons when there are missed calls or new Voice Mails.</td>
</tr>
</tbody>
</table>

PHONE SCREEN

The Phone screen is displayed after starting up the terminal.

Patterns of name and extension number to be displayed are set at initial installation. For details, please contact the system administrator.
STATUS ICON DISPLAY

The LCD displays icons in the icon information area when there are missed calls or new Voice Mails etc. You can check the status at a glance and access the services quickly.

The following icons are displayed:

<table>
<thead>
<tr>
<th>ICON</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Missed Call</td>
<td>This icon appears when there is a missed call. Once you check the missed call, this icon will disappear.</td>
</tr>
<tr>
<td>Cursor</td>
<td>This icon indicates the currently available direction of the cursor. This icon is displayed in the Menu Screen.</td>
</tr>
<tr>
<td>Voice Mail</td>
<td>This icon provides notification of incoming Voice Mail. Once you check the mail, this icon will disappear.</td>
</tr>
<tr>
<td>Bluetooth Connection</td>
<td>This icon appears, when a Bluetooth Connection Adapter(BCA) or Bluetooth Headset Adapter(BHA) is connected with the terminal.</td>
</tr>
</tbody>
</table>

LCD 3-LINE DISPLAY

Displays LCD information sent from the system. (Extension number, calendar, time, soft key etc.)

SHORTCUT MENU

The LCD displays icons when there are missed calls or new Voice Mails. You can open Shortcut Menu by pressing (1). You can also check missed calls or access the new Voice Mails from [Shortcut Menu].
<table>
<thead>
<tr>
<th>FEATURE</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Missed Calls</td>
<td>Display history of Missed Calls. The icon disappears after checking the history.</td>
</tr>
<tr>
<td></td>
<td>The number of calls of each history displayed in the Shortcut Menu will be the number of at that point. While the Shortcut Menu is displayed, the number of calls is not updated even if it is increased.</td>
</tr>
<tr>
<td>Voice Mail</td>
<td>Access to the Voice Mail System and retrieved message.</td>
</tr>
<tr>
<td>BCA Option</td>
<td>Set the function of BCA option unit. (Bluetooth Connection Adapter)</td>
</tr>
</tbody>
</table>

**SOFT KEYS**

Soft keys provide a set of functions on the LCD that adapts to the changing state of the terminal.

Patterns and names of Soft keys to be displayed are set at initial installation. For details, please contact the system administrator.

**EXAMPLE OF SOFT KEY FOR EACH STATUS**

The Soft keys appear corresponding to the services that are available depending on the state of the terminal. The following is an example display of the Soft key that corresponds to the state of the terminal.

- **IDLE STATUS**

  MARY SMITH           [200]

</tbody>
</table>
```
2. Press Soft key (FDN).
   Speaker key lamp light red → Speaker

   [CF-Busy/No Answer]
   Forward to: _
   11:00 AM SUN 1 JUN 2014
   Recall PICK >>>>

3. Dial the station number to be transferred.

   [CF-Busy/No Answer]
   SET 201
   11:00 AM SUN 1 JUN 2014

4. After 4 seconds, return back to the idle screen automatically. (or Press Speaker Key)
   Speaker key lamp goes off. → Speaker

**CANCELING CALL FORWARDING - BUSY LINE**

1. While setting Call Forwarding - Busy Line.
2. Press the Soft key (>>>>) repeatedly until display shows “FDN”.

   MARY SMITH [200]
   11:00 AM SUN 1 JUN 2014
   FDA FDN >>>>

3. Press Soft key (FDN).
   Speaker key lamp lights red. → Speaker

4. Press ✖.

   [CF-Busy/No Answer]
   CANCEL
   11:00 AM SUN 1 JUN 2014

5. After 4 seconds, return back to the idle screen automatically. (or Press Speaker Key)
   Speaker key lamp goes off. → Speaker
TERMINAL SETUP

ADJUSTING VOLUMES

TO ADJUST HANDSET RECEIVER VOLUME

It is possible to adjust the volume level of handset receiver during a call in progress using handset.

Press (Up) or (Down) in the offhook status or during a call using the handset.

After replacing the handset, the receiver volume returns to the original level.

TO ADJUST SPEAKER VOLUME

It is possible to adjust the volume level of speaker during a call in progress using speaker.

Press (Up) or (Down) during speakerphone operation or during a call using the speaker.

TO ADJUST LCD CONTRAST

It is possible to adjust the LCD contrast when the terminal is in idle status.

Press (Up) or (Down) when the terminal is not used or ringing, etc.

TO ADJUST RINGER TONE

It is possible to adjust the volume level of ringer tone during incoming call arrival.

1. Press key to display the Menu Screen.

2. Select Settings.
   - Highlight an item by using , and press , or Soft key (OK).
   - Press .

3. Select Ring Volume.
   - Highlight an item by using , and press , or Soft key (OK).
   - Press .
4. Adjust the volume level of ringer tone.
   • Press 
     (Up) or 
     (Down).

4. Select whether to turn On/Off of the LCD Back Light.
   Select one of the following operations.
   • Highlight an item by using 
     or Soft key (OK).
   • Press or , and press or Soft key (OK).

   The lighting time of back light is set by system data setting at installation. (The initial setting is 10 seconds.) For details, please contact the system administrator.

**TO ENABLE/DISABLE LCD BACK LIGHT**

Following explains how to set the brightness of the LCD back light.

1. Press 
   key to display the Menu Screen.

2. Select “Setting”.
   • Highlight an item by using 
     or Soft key (OK).
   • Press .

3. Select “Back Light”.
   • Highlight an item by using 
     or Soft key (OK).
   • Press .
TO USE HEADSET

TO MAKE/ANSWER A CALL WITH HEADSET

By using optional headset, it is possible to originate or respond to call. During using a headset, the onhook/offhook operation can be made by Headset/Handset feature key.

The feature key is set by system data setting at initial installation. For details, please contact the system administrator.

TO MAKE A CALL USING HEADSET

While placing the handset on the terminal, make a call using the headset.

   Line key lamp lights green.
2. Dial a desired number.
3. Start conversation after called party answered.
   Line key lamp lights off.

TO ANSWER A CALL USING HEADSET

While placing the handset on the terminal, answer a call using the headset.

2. Start conversation with calling party.
   Line key lamp lights off.
FEATURE OPERATION

This chapter describes how to login/logout, how to input characters and how to make a call/hold, etc.

MAKING A CALL

This section explains Preset Dialing. Before making a call, the terminal user can verify the dialed number displayed on the LCD. When a wrong number is entered, the user can correct the number before originating the call.

TO MAKE AN EXTERNAL CALL

Following explains how to make an external call.

1. Dial a desired number after dial the Central Office access code, e.g. 81XXXXXXXXXX.

2. Press Speaker key. Originate a call. Speaker key lamp lights red. →

TO MAKE AN INTERNAL CALL

Following explains how to make an internal call.

1. Dial a desired number.

2. Press Speaker key. Originate a call. Speaker key lamp lights red. →

ANSWERING A CALL

This section explains how to answer a call with Answer key.

TO ANSWER AN EXTERNAL CALL

1. While hearing a ringing tone, Call Indicator Lamp lights red. Answer key lamp lights red. → Line key lamp lights red. →

2. Press Answer key. Call Indicator Lamp goes off. Answer key lamp lights green. → Speaker key lamp lights red. → Line key lamp lights green. →

3. Lift the handset to answer the call.

TO ANSWER AN INTERNAL CALL

1. While hearing a ringing tone, Call Indicator Lamp lights red. Answer key lamp lights red. → Line key lamp lights red. →

2. Press Answer key. Call Indicator Lamp goes off. Answer key lamp lights green. → Speaker key lamp lights red. → Line key lamp lights green. →

It is possible to answer a call by pressing Line key that is flashing instead of Answer key.

It is possible to answer a call by lifting handset and then pressing Answer key or Line key.
3. Lift the handset to answer the call.

HOLDING A CALL (USING CALL HOLD)

This feature allows a terminal user to hold a call in progress by pressing the Call Hold key. This line can then be used for originating another call or returning to a previously held call.

TO HOLD

Following explains how to hold a call in progress.

1. **While a call in progress,**
   Line key that is used during a call lights green.
   Line key on the other terminals lights red.

2. **Press Hold key.**
   The person on the other end hears the Music on Hold.
   Line key that is placed on hold flashes green.
   Line keys on the other terminals flash red.

3. **Replace the handset or make a new call.**
TO RETRIEVE THE HELD CALL

Following explains how to retrieve the held call.

1. **While holding a call,**
   Line key that is placed on hold flashes green.
   
<table>
<thead>
<tr>
<th>HOLD</th>
<th>201</th>
</tr>
</thead>
<tbody>
<tr>
<td>11:00 AM SUN 1 JUN 2014</td>
<td></td>
</tr>
</tbody>
</table>

2. Press Line key that is placed on hold.
   Line key lamp lights green.
   
   | 201 |
   | 11:00 AM SUN 1 JUN 2014 |
   | MIC | Mute |

3. Lift the handset and return to the held call.
   It is possible to retrieve a call on hold from another terminal that has the same Line key flashing red.

IF UNANSWERED

- After predetermined time, Automatic Recall is initiated and the user hears Automatic Recall ringer tone. Default time is one minute.

- Starting time to ring Automatic Recall is set by system data setting at initial installation. For details, please contact the system administrator.

HOLDING A CALL (USING EXCLUSIVE CALL HOLD)

This feature allows a terminal user to place a call on Hold and to exclude all other station users from retrieving the held call.

TO HOLD

Following explains to hold the call in progress.

1. **While a call in progress,**
   Line key that is used during a call lights green.
   Line key on the other terminals lights red.

   | 201 |
   | 11:00 AM SUN 1 JUN 2014 |
   | MIC | Mute |

2. Press feature key.
   Feature key lamp lights red.

3. Press Hold key.
   Line key that is placed on hold flashes green.
   Line key on the other terminals lights red.
   Feature key lamp goes off.

4. Replace the handset.
TO RETRIEVE THE HELD CALL

Following explains how to retrieve the held call.

1. **While holding a call.**
   - Line key that is placed on hold flashes green. →
   - Line key on the other terminals lights red. →

2. **Press Line key that is placed in hold.**
   - Line key lamp that was placed on hold lights green. →
   - Line key on the other terminals lights red. →

3. **Lift the handset and return to the held call.**
   - Only the terminal that set Exclusive Hold may retrieve the held call.

IF UNANSWERED

After predetermined time, Automatic Recall is initiated and the user hears Automatic Recall ringer tone. Default time is one minute.

Starting time to ring Automatic Recall is set by system data setting at initial installation. For details, please contact the system administrator.

TRANSFER A CALL

TO TRANSFER A CALL (WITH ANNOUNCEMENT)

This feature allows a terminal user to transfer incoming or outgoing calls to another terminal within the system.

INITIATE TRANSFER (BY EX. 200)

1. **Call in progress.**
   - Line key lamp lights green. →

2. **Press Transfer key.**
   - You will receive a special dial tone.
   - Calling party is placed on hold.

3. **Dial the destination extension number.**
   - You will receive a dial tone.
   - The dialed extension number is displayed with flash.

4. **Destination extension answers transferred call.**
   - After the answer, announce the call is transferred.

5. **Replace the handset.**
   - Line key lamp goes off. →
   - A call is transferred.
ANSWER TO A TRANSFERRED CALL (BY EX. 210)

1. Ringing is heard. 
   Call Indicator Lamp flashes. 
   Line key lamp flashes red. → 
   The extension number that initiates call transfer is displayed on the LCD.

2. Lift the handset to start a conversation with the extension (200). 
   Call Indicator Lamp goes off. 
   Line key lamp lights green. →

3. Start conversation with transferred party. 
   • Extension (200) replaces the handset.

4. Replace the handset. 
   Line key lamp goes off. → 
   A call is transferred.

TO TRANSFER A CALL (WITHOUT ANNOUNCEMENT)

After dialing the transfer destination number, it is possible to replace a handset before answering the destination party. When the transfer destination party lifts the handset, it is automatically connected with transferred party. The phone number of transferred party is displayed on the destination terminal.

INITIATE TRANSFER (BY EX. 200)

1. Call in progress. 
   Line key lamp lights green. →

2. Press Transfer key. 
   You will receive a special dial tone. 
   Calling party is placed on hold.

3. Dial the destination extension number. 
   You will receive a dial tone.

ONE-TOUCH SPEED CALLING KEYS

This feature allows a terminal user to dial frequently-called numbers by pressing a One-touch key assigned for Station Speed Dialing.

Up to 32 digits can be registered for each dial number.

The feature key is set by system data setting at initial installation. For details, please contact the system administrator.

TO PROGRAM

Following explains how to register phone number to a One-touch Speed Calling key.

1. Press Feature key.
   Feature key lamp lights red. →

2. Press One-touch Speed Calling key.
   Feature key lamp flashes red. →
   Speaker key lamp lights red. →

3. Dial a desired number.

4. Press Feature key.
   Feature key lamp goes off. →
   Speaker key lamp goes off. →

If you dial a wrong number, you will need to start again from the beginning

To register a pause, press Transfer between any digits. The pause cannot be registered as a first digit.

TO MAKE A CALL

Following explains how to make a call with One-touch Speed Calling key.

1. Press One-touch Speed Calling key.
   Speaker key lamp lights red. →
   The desired number is automatically dialed.

2. When party has answered, lift the handset.
   Speaker key lamp goes off. →

TO VERIFY

Following explains how to confirm the registered number in the One-touch Speed Calling key.

1. Press Feature key.
   Feature key lamp lights red. →

2. Press a desired One-touch Speed Calling key.
   Feature key lamp flashes red. →
   Speaker key lamp lights red. →

3. Press Speaker key.
   Feature key lamp goes off. →
   Speaker key lamp goes off. →

When a phone number has been already registered in One-touch key, that number is displayed on the LCD. The previous number will be cleared when you register a new number.
**SPEED CALLING - STATION**

This feature allows a terminal user to dial long-digit or frequently-called numbers by pressing feature key and abbreviated code.

**TO REGISTER FOR SPEED CALLING - STATION**

1. **Press Feature key.**

CALL PICKUP - GROUP

This feature permits a terminal user to answer any calls directed to other extensions in their preset pickup group.

This feature is set by system data setting at initial installation. For details, please contact the system administrator.

This feature is set by Soft key or feature key. The feature key is set by system data setting at initial installation. For details, please contact the system administrator.

When you make a call handsfree, please note the following items.
- Avoid using in a place where there is a lot of echo or noise.
- The Microphone is located at the front of the terminal. It should be no further away than 50 CM.
- When talking handsfree be aware of the volume level as to not disturb people close to you.
- Talk alternately with the other party. The voice may be interrupted if both parties talk at the same time.

4. Start conversation with calling party.
CALL PICKUP - DIRECT

This feature permits a terminal user to pickup a call to any other terminal in the system.

1. Press Speaker key.
   - Speaker key lamp lights red. →
   - Line key lamp lights green. →

2. Press Call Pickup - Direct feature key.

3. Dial the extension number of ringing terminal.

4. Start conversation with calling party.

MULTILINE APPEARANCE

This feature allows you to accommodate the lines (another terminal number) other than My Line on the Programmable line/feature keys. When accommodating another terminal number on the Programmable line/feature key, the user can answer the call routed to another by pressing the key that is assigned.

TO ANSWER A CALL

1. A call is terminated to the terminal whose terminal number is accommodated to the Multiline Appearance feature key.
   - Call Indicator Lamp flashes.
   - Multiline key lamp flashes red. →

2. Press Multiline Appearance feature key.
   - Call Indicator Lamp goes off.
   - Speaker key lamp lights red. →
   - Multiline key lamp lights green. →

3. Lift the handset to start a conversation.
   - Speaker key lamp goes off. →

When you press a feature key with a call in progress, the call will be disconnected.
DND (DO NOT DISTURB)

This feature restricts incoming calls to a terminal.

This feature is set by Soft key or feature key. The feature key is set by system data setting at initial installation. For details, please contact the system administrator.

TO SET DND

1. Press Speaker key.
   Call Indicator Lamp goes off.

TIMED QUEUING (OUTSIDE LINE ONLY)

When a user originates an outgoing trunk call and the called party is busy or does not answer, the caller can set the Timed Queuing. When this feature is set, the trunk seizure is repeated and the number is dialed again after a predetermined time interval.

The feature key is set by system data setting at initial installation. For details, please contact the system administrator.

1. Press Speaker key.
   You will receive a dial tone.
   Speaker key lamp lights red. →

2. Dial Outside Line access code.

3. Dial desired number.
   You will receive a busy tone or a ring no answer from distant end.

4. Press Call Back feature key.
   Line key lamp is flashing green. →

5. Leave speaker on.
   The desired number is automatically redialed.

6. Start conversation with called party.

Busy tone is sent to the calling party when the call is made to the extension that is in Timed Queue mode.

TO MAKE/ANSWER A CALL DURING CALL IN PROGRESS

This feature permits a user to hold a call in progress by pressing the Call Hold feature key. This line can then be used for originating another call or answering another incoming call. After finishing another call and replace the handset, the original held call rings back.

It is required that the dedicated feature key other than fixed feature key (Hold) shall be set by system data setting at initial installation. For details, please contact the system administrator.

1. While call in progress,
   The Line key lamp lights green. →

2. Press call hold feature key.
   Call hold feature key lamp doesn't light. →
   The called party will receive a hold tone.

3. To make a call to another party or answer the incoming call.
   Replace the handset after finishing a call.

4. The original call rings back.
   Call Indicator Lamp flashes red.
   Line key lamp flashes red. →
5. Lift the handset to restart a conversation.
Line key lamp lights green. →

3. Start conversation with called party.
STEP CALL
This feature allows the terminal user, after calling a busy terminal, to call an idle terminal by simply dialing an additional digit.

The feature is set by system data setting at initial installation. For details, please contact the system administrator.

1. Lift the handset.
  Line key lamp lights green. →

2. Dial the extension number.
  You will receive a busy tone.

3. Dial the last digit (0-9) of another terminal.
  Example: Dial “2”.

   BUSY 201
   11:00 AM SUN 1 JUN 2014
   CB CW >>>>

   202
   11:00 AM SUN 1 JUN 2014
   MIC Mute

It is possible to select the last digit of the extension number from 0-9 arbitrarily.

CALL WAITING
This feature allows a terminal to camp itself on to a busy terminal.

This feature is available only for the terminal that is set by system data setting at initial installation. For details, please contact the system administrator.

TO ACTIVATE CALL WAITING
1. Receive a busy tone.

   BUSY 201
   11:00 AM SUN 1 JUN 2014
   CB CW >>>>

2. Press Transfer key.

3. Press Soft key (CW).
   You will receive a special ringback tone.

   CW SET 201
   11:00 AM SUN 1 JUN 2014
   Recall VOICE CB >>>>

TO ANSWER CALL WAITING
1. Call in progress.

   210
   11:00 AM SUN 1 JUN 2014
   MIC Mute

2. Call Waiting feature is set.
   Answer key lamp flashes red. →
   You will receive a Call Waiting tone (three tone bursts).

   CALL WAITING 201
   11:00 AM SUN 1 JUN 2014
   MIC Mute
3. **Press Answer key.**
   The original party is placed on hold and connected to another party who initiates Call Waiting feature.

4. **Press Answer key again.**
   Return to the original party and another party is placed on hold. (It is possible to change the connection as many times.)

---

**EXECUTIVE OVERRIDE**

This feature allows selected users to override a busy condition on a called terminal.

The feature key is set by system data setting at initial installation. For details, please contact the system administrator.

---

(1) Call in progress.
(2) Override.
The terminal “b” is talking with the terminal “c”, and the terminal “a” is going to override the connection.

1. **Terminal “a” dials 201. (The called party is a call in progress.)**
   You will receive a busy tone.

     11:00 \ \text{AM}\n     1 \ \text{JUN} \ 2014
     \end{array}
     \]

4. Press Speaker key.
   Speaker key lamp goes off. → Speaker
   
   If a programmable key is used the lamp indication will be as follows:
   - Night Mode = Red lamp on
   - Mode-A = Red lamp flashing (60 ipm)
   - Mode-B = Red lamp flashing (120 ipm)

---

**CALL HISTORY**

This feature records information such as numbers you have dialed or ones received from other parties. And also it allows a terminal user to make a call using the recorded data.

The history data of incoming and outgoing calls are recorded in the system memory. They are not recorded in the terminal.

**OUTGOING CALL HISTORY**

The outgoing call history can store up to 60 records per terminal. If the number of registered records exceeds 60, the oldest stored number is deleted and the new number is stored.

**TO VIEW CALL HISTORY**

There are following two ways to display outgoing call history.

**DISPLAYING OUTGOING CALL HISTORY BY PRESSING SOFT KEY (HIST.)**

1. Press Soft key (HIST.).
   Speaker key lamp lights red. → Speaker
   
   [Call History]
   
   MARY SMITH \[200\]
   11:00 AM SUN 1 JUN 2014
   OG IC

2. Press Soft key (OG).
   The history of the last outgoing call is displayed.
   
   [Outgoing Calls] \[01\]
   1 JUN 11:00 JAMES SMITH \[201\]
   <<< Redial ↑Prev ↓Next
3. Display the target outgoing call history.
Select one of the following operations.
- Press \( \text{ } \).
- Press Soft key (↑Prev) or Soft key (↓Next).

```
[Outgoing Calls] 02
1 JUN 10:00 JOHN JOHNSON
210
<<<< Redial ↑Prev ↓Next
```

4. Display the target outgoing call history.
Select one of the following operations.
- Press \( \text{ } \).
- Press Soft key (↑Prev) or Soft key (↓Next).

```
[Outgoing Calls] 02
1 JUN 10:00 JOHN JOHNSON

DOUBLE HEIGHT CHARACTERS ON LCD

One of the four lines in the LCD can be displayed in double height size. While one line is being displayed in double height size, one of the other lines disappears. By pressing the programmable feature key which has been assigned to "Enlarge Line↓" or "Enlarge Line↑" (hereinafter, called as Enlarge Line↓/Enlarge Line↑ key), the display can be changed.

The feature keys are set by system data setting at initial installation. For details, please contact the system administrator.

TO CHANGE OF THE TARGET LINE TO BE DISPLAYED IN DOUBLE HIGHT SIZE

By pressing the Enlarge Line↓/Enlarging Line↑ key, the target line is changed.

Normal indication

(1) The first line
(2) The second line
(3) The third line
(4) The fourth line

When the first line is displayed in double height size,
TO SET REVERSING CONTRAST ON LCD

This feature allows the LCD display to reverse the contrast black-and-white.

TO SET REVERSING CONTRAST FROM NORMAL SCREEN

Following explains how to reverse the LCD contrast.

1. While displaying the normal screen,

2. Press Reverse Contrast feature key.
   The display is changed normal screen.

   MARY SMITH    [4001]
   11:00 AM SUN 1 2014
   MIC    DIR    HIST.    >>>>

The feature key is set by system data setting at initial installation. For details, please contact the system administrator.

TO SET REVERSING CONTRAST FROM REVERSE SCREEN

Following explains how to reset the LCD contrast.

1. While displaying the reverse screen,
DIAL BY NAME

This feature is a common/personal directory service which is supported by UNIVERGE SV9300 communication server. This feature allows a terminal user to search desired party by name. After searching the called party, the user can originate a call to that party.

The feature is set to the terminal by system data setting at initial installation. For details, please contact the system administrator.

The maximum number of directory registered per terminal is set by means of system data setting. For details, please contact the system administrator.

The dialed numbers of common directory are set by system data setting at initial installation. For details, please contact the system administrator.

TO MAKE A CALL USING DIAL BY NAME

1. Display the search screen.
   • When using the Speed Calling – System, press Soft key (DIR).
   • When using the Speed Calling – Station,
     • Press (Searching for Directory).
     • Press key to display the Menu Screen and select “Directory”.

   | MARY SMITH   | [200] |
   | 11:00 AM SUN 1 JUN 2014 |
   | MIC DIR HIST. | >>>>> |

2. Enter the characters of the name that want to search.

   Up to 4 characters can be entered for keyword searching.

   Please refer to “APPENDIX B INPUT CHARACTERS” on page 79 for how to enter the character.

   | [Dial by Name] |
   | NAME : SMIT |
   | (ABC) ENTRY Common Person |

3. Select the directory database.
   (Common or Personal directory)
   Press Softkey (Common) or Soft key (Person)
   • Display example of when you pressed Soft key (Common)

   | [Dial by Name] |
   | NAME : SMIT |

   • Display example of when you pressed Soft key (Person)

   | [Station Speed Dialing] |
   | 03: |
   | Back ENTRY ↑Prev ↓Next |

   When pressing Soft key (↑Prev) or Soft key (↓Next) without entering the keyword, the registered dial number or name is displayed on the LCD in order.

4. Press Speaker key or to make a call.

   You will receive a dial tone.
   Speaker key lamp lights red. → Speaker
   Line key lamp lights green. →

   | 81 XXXXXXXXXX |
   | JAMES SMITH |
   | Recall PICK | >>>>> |
5. Lift the handset to start a conversation.
   Speaker key lamp goes off. → Speaker

TO REGISTER PERSONAL DIRECTORY

Following explains how to register the called party into the personal directory.

1. Press Soft key (DIR).

2. Press Personal Soft key.

3. Search the vacant area of directory.
   Select one of the following operations.
   • Press .
   • Press Soft key (↑Prev) or Soft key (↓Next).

4. Register the information of the called party.
   Press or Soft key (ENTRY).
5. Press or Soft key (NAME) and then register the name.

- Up to 16 characters can be registered for each name.
- Please refer to "TABLE OF INPUT CHARACTERS" on page 79 for the character that can be entered.
- When returning to the previous screen, press or Soft key (CANCEL).
- When erasing a character, press Soft key (BK).

6. Press or Soft key (SET).

```
[Station Speed Dialing]
NAME :  
(ABC) CANCEL BK SET
```

7. Press or Soft key (SET) to register the dial number.

- Up to 30 digits can be registered for each dial number. (access code: up to 4 digits, called number: up to 26 digits)

8. Press or Soft key (SET).

```
[Station Speed Dialing]
NUMBER : 201
SMIT
CANCEL BK SET
```

- If it is not necessary to register the dial number just press or Soft key (SET) without entering the dial number.
- When returning to the previous screen, press or Soft key (CANCEL).
- When erasing a character, press or Soft key (BK).

9. Press or Soft key (OK).

```
[Station Speed Dialing]
03: SMIT 201

APPENDIX B INPUT CHARACTERS

HOW TO INPUT CHARACTERS

SYSTEM/STATION SPEED DIALING FEATURE

Press the dial key to display the character. The character will be changed by repeatedly pressing the dial. After displaying the desired character, press 2 or 3.

Example: When inputting with “MARY SMITH”,

6# 2# 777# 999# 0# 7777# 6# 444# 8# 44#
MARY SMI TH

The following two input mode can be specified.

• ABC: English input mode.
• NUM: Number input mode.

Input mode switches over by pressing the Soft key repeatedly (“ABC” → “NUM” → “ABC”).

Up to 4 characters can be entered for keyword searching.

Up to 16 characters can be registered for each name.

Up to 30 digits can be registered for each dial number.

The default setting is English input mode.

Please refer to “TABLE OF INPUT CHARACTERS” on page 79 for the character that can be entered.

APPENDIX C PAIRING WITH SMART DEVICE

GENERAL DESCRIPTION

Bluetooth Connection Adapter (BCA) is an option unit which is mounted at the bottom of the terminal. It provides a connection path between the terminal and smart device through Bluetooth interface. With this BCA option, you can use terminal handset for the incoming call to the smart device. Also, it offers hands free conversation by using microphone and speaker of the terminal. If there is a sound source such as music in the smart device, it is possible to listen to the sound from the speaker of the terminal.

(1) BCA Option UNIT

BCA option unit provides two operation modes as follows.

• Wired Telephone Mode
  The terminal operates as an extension of communication server. The terminal starts operation with this mode after starting up the communication server.

• Mobile Phone Mode
  The terminal is connected with smart device via Bluetooth. When there is an incoming call to the smart device, it is possible to answer by lifting up the handset of the terminal.

Feature Keys

<table>

<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>This icon appears when BCA option is mounted on the terminal and connected with Smart Device through Bluetooth.</td>
</tr>
</tbody>
</table>

LCD 3-LINE DISPLAY
Displays LCD information sent from the communication server.

USING BLUETOOTH FUNCTION
In order to use the BCA feature, please make sure your smart device is designed to operate on HFP (Hands-Free Profile), A2DP (Advanced Audio Distribution Profile) and AVRCP (Audio/Video Remote Control Profile). Also, to make a Bluetooth connection using the terminal with BCA, the terminal must be connected with the communication server.

The status of Bluetooth function and connection status of the smart device can monitor by Connect key lamp. The following table shows the lamp indication of each connection status.

<table>
<thead>
<tr>
<th>Lamp Indication</th>
<th>Function/Connection Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Bluetooth function is not activated.</td>
</tr>
<tr>
<td>Red lamp on</td>
<td>Bluetooth function is activated.</td>
</tr>
<tr>

<td>Terminal and BCA option unit is in pairing mode with smart device.</td>
</tr>
<tr>
<td>Green lamp on</td>
<td>Terminal and BCA option is connected to smart device through Bluetooth.</td>
</tr>
</tbody>
</table>
**HOW TO PAIR TERMINAL AND SMART DEVICE**

In order to use the smart device with the terminal, it is required to pair the terminal/BCA option unit with smart device.

1. **Confirm the Bluetooth function is off. (Connect key lamp is off.)**
2. **Long-Press the Connect key more than 8 seconds. Then, pairing mode is activated.**
   - Keep pressing the Connect key until it flashes red and green alternately, although it will light red after 3 seconds.
3. **To activate the scan and pair the terminal from the smart device.**
   - Please refer to the manual of the smart device for how to scan and pair the terminal.
   - The Bluetooth function will be activated automatically, if you do not make any operation to the smart device for 120 seconds, after the pairing mode is started.

**ENABLE BLUETOOTH FUNCTION**

1. **Long-press the Connect key more than 3 seconds, when Bluetooth function is off. (Connect key is off.)**
2. **Connect key lights red, and Bluetooth function is activated.**
   - After starting-up the terminal, Bluetooth function is activated automatically.
   - After the Bluetooth function is started, the smart device that has been connected last is connected through Bluetooth to the terminal.

**DISABLE BLUETOOTH FUNCTION**

1. **During the Connect key lamp lights red, long-press the Connect key more than 3 seconds.**

---

<table>
<thead>
<tr>
<th>Lamp Indication</th>
<th>Function/Connection Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>Green lamp flashing</td>
<td>Smart device have a conversation without via Bluetooth.</td>
</tr>
</tbody>
</table>
2. Connect key lamp goes off and Bluetooth function will be disabled. → 

It is not possible to disable the Bluetooth function when the terminal and smart device is in processing of pairing connection.

CONNECT WITH SMART DEVICE

The terminal can be connected with smart device which has completed pairing, automatically or manually. Only the smart device that has been connected last can be connected through Bluetooth to the terminal.

AUTOMATIC CONNECTION

1. Confirm the Bluetooth function is on. (Connect key lamp lights red.) → 
2. Place the smart device that has been connected last through Bluetooth near the terminal. (Effective range of Bluetooth radio interface is within 10 meter from the terminal approximately.)
3. The terminal is connected to the smart device through Bluetooth automatically.

MANUAL CONNECTION

1. Confirm the Bluetooth function is on. (Connect key lamp lights red.) → 
2. Press Connect Key. (Less than 3 seconds)
3. The terminal is connected to the smart device through Bluetooth.

SWITCH TERMINAL’S HANDSET TO SMART DEVICE

When you converse with caller using terminal handset, you can switch to the smart device and continue the conversation without disconnecting the call.

1. When you are in conversation with caller through mobile phone network, press Connect key. (Less than 2.5 seconds)
2. Converse with caller using smart device.

If you press Connect key once again, you can return to the terminal handset and continue conversation.

SWITCH THE MODE OF TERMINAL

When the terminal is connected with smart device though Bluetooth, the terminal mode can be switched by pressing the Path key. (Wired Telephone Mode/ Mobile Phone Mode)

The status of the terminal mode switched by the Path key lamp is as follows.

<table>
<thead>
<tr>
<th>MODE</th>

</tr>
</tbody>
</table>

SWITCH THE MODE OF TERMINAL (WIRED TELEPHONE MODE/ MOBILE PHONE MODE)

1. Press Path key when the smart device is idle or receiving an incoming call.
2. The mode is changed. (Wired Telephone mode or Mobile Phone mode)

TO SET SMART DEVICE TYPE BY PATH KEY

This section explains how to set the type of smart device to be connected to the terminal by using Path key. The following smart device types can be set to the terminal.

- Type1: iPhone, iPad
- Type2: Other Smart Device

1. Long press Path key, when the terminal is idle.
2. After the smart device type is set, confirmation beep is heard as follows.

Type1
- Once (iPhone, iPad)

Type2
- Twice (Other Smart Device)

For the detail of the smart device vender and model that has been verified the proper operation, please contact the system administrator.

iPhone and iPad are registered trademarks of Apple Inc.
TO ANSWER A CALL USING BCA OPTION

The terminal can receive an incoming call from both communication server and smart device.

TO ANSWER A CALL FROM COMMUNICATION SERVER

1. While hearing a ringing tone.
   Call Indicator Lamp lights.
   Answer key Lamp lights red. → Answer
   Line key lamp lights red. →

2. Confirm the Path key lamp is off or lights orange.
   (The terminal is in Wired Telephone mode)

3. Lift the handset start conversation with calling party.

   It is possible to answer a call by pressing speaker key for hands free conversation.
   When the terminal is Wired Telephone mode and if the incoming calls are received from both communication server and smart device at the same time, the call from communication server is answered by lifting handset or pressing speaker key.

   When the terminal is in Mobile Phone mode, the Path key lamp is lighting green. In this case, you can answer to an incoming call by pressing Path key to change to the Wired Telephone mode prior to lift the handset.

When an incoming call is received, the Call Indicator Lamp flashes as follows.

<table>
<thead>
<tr>
<th>LAMP INDICATION</th>
<th>TERMINAL STATUS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Flashing Red</td>
<td>Receiving an incoming call from communication server to the terminal.</td>
</tr>
<tr>
<td></td>
<td>According to the system setting, the lamp will be flashing in another color.</td>
</tr>
<tr>
<td></td>
<td>For details, please contact the system administrator.</td>
</tr>
<tr>
<td>Flashing Blue</td>
<td>Receiving an incoming call from mobile network to the smart device.</td>
</tr>
<tr>
<td>Flashing Red and Blue</td>
<td>Receiving an incoming call to both the terminal and smart device at the same time.</td>
</tr>
</tbody>
</table>

TO MAKE A CALL

If you make a call through communication server, confirm both Connect Key and Path key are lighting green. And then dial the desired number. For details, refer to “MAKING A CALL” on page 29.

The terminal is not possible to make a call to mobile phone network through the smart device.

TO ANSWER A CALL TO THE SMART DEVICE BY USING TERMINAL HANDSET

1. An incoming call is terminated to the smart device.
2. Confirm both Connect key and Path key are lighting green.
3. Lift the handset to answer the call.
4. Start conversation with calling party.

**TO MUTE A MIC**

During conversation with hands free (using microphone and speaker of the terminal), it is possible to mute the microphone with the following steps.

1. Press Soft key (MUTE).
   The microphone is muted.
   The calling party's voice can be heard from the speaker.
2. Press Soft key (MUTE) once again.
   The microphone becomes available.

**PLAY MUSIC BY USING TERMINAL SPEAKER**

When the terminal and smart device is connected through Bluetooth, it is possible to play music which is stored in smart device by using terminal speaker.

**PLAY MUSIC**

1. Play music of smart device.
   Refer to the users' manual of smart device for how to play music.
2. When the terminal handset is onhook, Speaker lamp lights red. → Speaker
   The music is heard from terminal speaker automatically.
3. Adjust the volume level by using key.

   If you lift the handset during playing music by using terminal speaker, the music will be heard from handset receiver. And after you replace the handset, the music play is stopped.

**STOP THE MUSIC PLAY FROM SPEAKER**

1. Press Speaker key.
   Speaker key lamp goes off. → Speaker
2. The music play from speaker is stopped.

   If you press the Speaker key once again, the music is played from the terminal speaker.

   If the sound is small or distorted, please adjust the volume on smart device.

   After stopping the music play from terminal speaker, the music keeps playing on smart device. If you want to stop the music, please stop it on smart device.
APPENDIX D TO SET BCA OPTION UNIT

This section explains how to set BCA option unit. (Bluetooth Connection Adapter)

TO ENABLE/DISABLE AUTO CONNECTION

Auto Connection is the function to connect the terminal with smart device through Bluetooth using BCA option unit. The connection is initiated with predetermined interval by BCA option unit. And the connection will be made if you place the smart device that has been connected last through Bluetooth near the terminal. (Effective range of Bluetooth radio interface is within 10 meter from the terminal approximately.)

1. Press \text{Menu} key to display the Menu Screen.

2. Select “\text{3} settings”.
Select one of the following operations.
\begin{itemize}
  \item Highlight an item by using \text{ }, and press \text{ }\text{ or }\text{ } or Soft key (OK).
  \item Press \text{1}.
\end{itemize}

3. Select “\text{5} Peripherals”.
Select one of the following operations.
\begin{itemize}
  \item Highlight an item by using \text{ }, and press \text{ }\text{ or }\text{ } or Soft key (OK).
  \item Press \text{3}.
4. **Select "BCA Option".**
   Select one of the following operations.
   • Press  or Soft key (OK).
   • Press  

   ![Screenshot of BCA Option menu]

5. **Select "BCA Connection Settings".**
   Select one of the following operations.
   • Highlight an item by using  and press  or Soft key (OK).
   • Press  

   ![Screenshot of BCA Connection menu]

6. **Select "Auto Connection".**
   Select one of the following operations.
   • Press  or Soft key (OK).
   • Press  

   ![Screenshot of Auto Connection menu]

7. **Select Enable or Disable of Auto Connection.**
   Select one of the following operations.
   • Highlight an item by using  and press  or Soft key (OK).
   • Press  or  

   ![Screenshot of Auto Connect menu]
TO SET CONNECTION CYCLE

Connection Cycle is the interval of time to initiate the connection to the smart device through Bluetooth.

1. Refer to “TO ENABLE/DISABLE AUTO CONNECTION” on page 88 and display BCA option.

2. Select "BCA Connection Settings".
   Select one of the following operations.
   • Press \( \text{or Soft key (OK).} \)
   • Press \( \text{.} \)

   ![BCA Option 1/2]

   1. BCA Connection
   2. Interrupt Ringing

3. Select "Connection Cycle".
   Select one of the following operations.
   • Highlight an item by using \( \text{, and press \( \text{, or Soft key (OK).} \)
   • Press \( \text{.} \)

   ![BCA Connection 1/1]

   1. Auto Connection
   2. Connection Cycle

4. Select the interval of time.
   Select one of the following operations.
   • Highlight an item by using \( \text{, and press \( \text{, or Soft key (OK).} \)
   • Press \( \text{-} \), and press or Soft key (OK).

TO SET INTERRUPT RINGING

Using BCA option, it is possible to receive a call from communication server as an extension. Also it is possible to receive a call to a smart device from mobile phone network. If you are in conversation with one side, the interrupt ringing will alerts you when there is an incoming call from another side.

1. Refer to “TO ENABLE/DISABLE AUTO CONNECTION” on page 88 and display BCA option.
2. Select "3 Interrupt Ringing".
Select one of the following operations.
• Highlight an item by using \[\text{\textdagger}\], and press \[\text{\textsection}\]. \[\text{\textsection}\] or Soft key (OK).
• Press \[\text{\textsection}\].

3. Select Enable or Disable of Interrupt Ringing.
Select one of the following operations.
• Highlight an item by using \[\text{\textdagger}\], and press \[\text{\textsection}\]. \[\text{\textsection}\] or Soft key (OK).
• Press \[\text{\textsection}\] or \[\text{\textsection}\].

TO SET SMART DEVICE TYPE
Set the type of smart device to be connected to the terminal.
• Type1: iPhone, iPad
• Type2: Other Smart Device

1. Refer to "TO ENABLE/DISABLE AUTO CONNECTION" on page 88 and display BCA option.
2. Select "3 Smart Device Type".
Select one of the following operations.
• Highlight an item by using \[\text{\textdagger}\], and press \[\text{\textsection}\]. \[\text{\textsection}\] or Soft key (OK).
• Press \[\text{\textsection}\].
3. **Select the type of smart device.**
   Select one of the following operations.
   - Highlight an item by using [ ], and press [ ] or Soft key (OK).
   - Press 1 or 2.
   (Type1: iPhone, iPad / Type2: Other Smart Device)
